Re: WATER SUPPLY CHANGES

Dear Customer:

On Monday October 25, 2021, the water department will begin converting the water supply from the water plant within the KTC facility to water supply from the Municipal Authority's own water filtration plant. During this transition, we will be flushing the system which may result in some discoloration and fluctuations in water pressure while the flushing is in progress. We estimate the process will take 2 to 3 days to complete. MMA will be sampling and testing the water throughout the system during the transition. We anticipate no changes in the available water supply and improvements to the water quality following the transition. We apologize for any inconvenience this may cause.

Sincerely,

Morrisville Water Department
